STATE CLEARINGHOUSE

---

# NEWSLETTER

**June 16 through 30, 2002**

# STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **June 16 through 30, 2002.**

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov/clearinghouse.html#clearinghouse](http://www.opr.ca.gov/clearinghouse.html#clearinghouse)

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Gregoria Garcia (for projects in Northern California)  
Becky Frank (for projects in Southern California)

## CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE  
P.O. BOX 3044  
SACRAMENTO, CA 95812-3044

## INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

# CEQA & Planning Case Law

## **Summary of Recent CEQA & Planning Case Law**

The following are summaries of recent court cases relating to the California Environmental Quality Act and/or land use planning law.

**No Cases have been selected for the period of June 16 -30, 2002.**

*Please be advised, the information contained in these summaries does not constitute legal advice, nor should the summaries be relied upon as a matter of law. Refer to the full text of the cases cited for the complete ruling and case facts.*

# Federal Notices

## Intergovernmental Review Notices (June 16<sup>th</sup> – 30<sup>th</sup>, 2002)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

**Agency:** Pacific Gas and Electric Company

**Contact:** Rhonda Shiffman

**Telephone:** (415) 973-5852

**E-mail:** N/A

**Address:** 245 Market Street, San Francisco, CA 94105

**Description:** Pacific Gas and Electric Company requests the Commission's approval to deviate from the required minimum flow release into the Pit 4 River reach to conduct the fish sampling survey required in the Commission's Additional Information Request for the Pit 3, 4, 5 Relicensing Project. This short-term flow reduction is requested in the Pit 4 River to improve visibility for direct observations, and to facilitate backpack electrofishing in the riffle and run habitats.

|---|---|------------------|----------------|
| <b><u>Documents Received on Monday, June 17, 2002</u></b> |   |                  |                |
| 2002011002  | Skypark Marketplace Development<br>Fresno, City of<br>--Fresno<br>The project consists of development of a neighborhood commercial center composed of approximately 77,127 square feet, including a supermarket, neighborhood retail uses, a convenience store/gas station and up to two restaurants.   | <b>EIR</b>       | 07/31/2002     |
| 2001082113  | Arcadia Mixed Use Development Project<br>Brentwood, City of<br>Brentwood--Contra Costa<br>Two alternate site plans have been developed for the project site. Plan A would concentrate on employment-type uses and divide the project site into 14 parcels. The commercial/retail component would occupy 12 of the parcels and provide 686,400 gross square feet of commercial and retail uses occupying 71.8 acres of the project site. The office component would occupy the other two parcels and provide for 24,850 gross square feet of office space on 3.4 acres. Plan B recognizes the General Plan's desire to provide complementary housing where it would support large employment centers. Under this scheme, the site would be divided into 12 parcels. Parcels 1 through 9 would occupy 51 acres and provide land for a mix of commercial and retail uses totaling 495,300 square feet. Parcel 10, consisting of 19 acres, would be developed with very high density residential uses at an average density of 25 dwelling units per acre, yielding about 474 units. Parcels 11 and 12 would constitute about 5 acres of office use, or about 34,600 square feet. | <b>FIN</b>       |                |

| 2001082060  | Jolly Giant Creek Improvements<br>Arcata, City of<br>Arcata--Humboldt<br>The installation of baffles within a 120 foot section of an existing culvert will improve juvenile and adult coho, steelhead and coastal cutthroat trout passage through this section of Jolly Giant Creek.   | <b>NOD</b>       |                |
| 2001112018  | Laguna Creek Pipeline Access Road Repair Project<br>Santa Cruz, City of<br>--Santa Cruz<br>Construction of three retaining walls and road repair in two locations, shoring two bridges in order to bring equipment to the repair site, and drainage improvements.  | <b>NOD</b>       |                |
| 2002012011  | State Route 219 Widening Project<br>Caltrans #6<br>Modesto--Stanislaus<br>The California Department of Transportation (Caltrans), in cooperation with the Modesto City Planning Department, the Stanislaus County Planning Department, and the Stanislaus Council of Governments (Stan COG) is proposing to widen State Route 219 in the city of Modesto in Stanislaus County, California. The proposed project would upgrade the existing roadway from a two-lane conventional highway to a four-lane conventional highway. In addition, Caltrans would improve intersections and add a median and clear recovery zone.   | <b>NOD</b>       |                |
| 2002012082  | Ubiquitel Leasing Corporation Special Permit (SP-01-26) for a 120 Foot Tall Cellular Communication Tower<br>Humboldt County Planning Department<br>--Humboldt<br>A Special Use Permit is required for a cellular communications tower which will exceed the allowed 35' height limit in the Agriculture General (AG) zone. The proposed tower will be 120' tall. The tower will be a monopole design without top lighting. Three panel antennae are proposed now, with the potential to accommodate two more sets of panels at a future date. The applicant has leased a 2,000 sf area on the subject 1.5 acre parcel which will be served by a 20' access easement off of North Bank Road. The lease area will be surrounded by a 6' high chain link fence with barbed wire on top. Also proposed within the lease area will be an 8'x15' concrete slab on which one modular cell cabinet (5'hx75 sf) and one power cabinet (5.5'hx77.5 sf) will be developed. Other providers will be able to co-locate on this tower and place additional cabinets within the lease area. A Building Permit and cumulative RF Study will be required of this applicant and each future provider in order to co-locate. The parcel is currently developed with a single family residence and accessory structures. | <b>NOD</b>       |                |
| 2002022086  | Conagra Oakdale Facility - Land Application Area Expansion<br>Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento<br>Oakdale--Stanislaus<br>The project is the expansion of the ConAgra Oakdale Facility land application area for disposal of process wastewater. Tomato and bean processing wastewater will be used to irrigate pasture owned by others using border strip irrigation. Tail water will be conveyed to storage ponds for recycling. Construction of a storage pond associated pipes to convey wastewater will take place on private land.   | <b>NOD</b>       |                |

| 2002068134   | YOL 80-Slipout Project<br>Caltrans #3<br>West Sacramento, Davis--Yolo<br>The proposed project intends to rehabilitate a portion of the YOL 80 embankment (KP 10.7/10.8) along the Yolo Causeway. The embankment stability has been compromised due to a slipout caused by winter storms. The failed material will be removed, dried, reconstructed, and re-seeded. The embankment material will be placed along the adjacent slope and access roadbed to dry and be combined with engineered fill. The design will include trenching a key to provide for a better design. Access will be obtained through the main entrance of the Vic Fazio Wildlife Area. The parking area near the main entrance along the access road is a potential area for staging and fill material drying. All equipment will remain on the access road or in the designated parking area. Adjacent sensitive areas will be avoided by placement of sediment fencing on the north side of the access road. To prevent the spread of noxious weeds, all equipment and vehicles shall be thoroughly cleaned to remove dirt and seeds prior to being transported or driven to the project site. | <b>NOE</b>       |                |

| 2002061091   | Vista Grande Reservoir Replacement Project<br>Otay Water District<br>--San Diego<br>The project consists of the replacement of an existing 1.0 MG potable water storage reservoir through the construction of a 6.0 MG steel potable water reservoir on the existing 1.03 acre reservoir site owned by the Otay Water District (District). Following the demolition of the existing 26-foot tall reservoir, the foundation pad will be widened and lowered to allow expansion of the storage capacity from 1.0 MG to 6.0 MG while allowing the existing water level to remain the same. The new water tank will be 146 feet wide, approximately double the width of the existing tank, and 36 feet tall. However, it will only measure 26 feet above the existing ground level due to the lowering of the graded foundation.   | <b>Neg</b>       | 07/18/2002     |
| 2002061092   | Conditional Use Permit 01-16, Nextel Communications Applicant<br>Poway, City of<br>--San Diego<br>Nextel proposes to construct, operate, and maintain an unmanned, Enhanced Specialized Mobile Radio (ESMR) communications facility on the developed residential property located at 1501 Mina De Oro. The facility consists of 12 panel antennas, measuring 1 foot wide and 4 feet in length, with 2 sectors (of 8 antennas) mounted directly to an equipment enclosure and one sector (of 4 antennas) pole-mounted adjacent to an existing water tank. A 230-square-foot equipment enclosure is proposed to house equipment for the facility. One BMR and 2 GPS antennas will be installed on the equipment building. The shelter will be painted to blend in with the natural backdrop of vegetation and hillside.  | <b>Neg</b>       | 07/18/2002     |
| 2002061093   | Salton Sea Vertical Tube Evaporation Pilot Project<br>Salton Sea Authority<br>--Imperial<br>The Salton Sea is excessively saline, affecting the ability of the Sea to sustain its biological resources. The Salton Sea Authority would conduct a 7-month pilot project to demonstrate the feasibility of reducing the salinity of the Sea water by using geothermal steam, rejected from power turbines at the Cal Energy plant, to drive the desalination process using vertical tube evaporation. The evaporator facility is a brine concentrator prototype designed, constructed, and tested on seawater for 1 year at the University of California and for 18 years in Modesto, California. In 2002, the evaporator facility was dismantled and moved to the U.S. Bureau of Reclamation's Salton Sea Navy Test Site, where it would be cleaned and repainted for this project. The equipment would be assembled on a 35-foot by 35-foot reinforced concrete pad at the CalEnergy Geothermal Plant, located at 6920 Lack Road, Calipatria, California. The heat energy from the steam is re-used about 15 times to generate 15-fold its weight in distilled water. Gypsum and brine are the other two products of this process. The distilled water would be mixed with untreated Salton Sea water and/or brine and discharged back into the Sea. The gypsum would be trucked to an authorized disposal facility. Brine would also be | <b>Neg</b>       | 07/18/2002     |

|  | Section 1601.   |                  |                |
| 2002068170   | Bridge Construction Over Porter Creek<br>Fish & Game #3<br>--Sonoma<br>The project consists of placing a bridge over the stream which will eliminate the need for a low water crossing which now exists. Issuance of a Streambed Alteration Agreement Number R3-2002-0283 pursuant to Fish and Game Code Section 1603.  | <b>NOE</b>       |                |
| 2002068171   | Estrella River Sand Extraction<br>Fish & Game #3<br>Paso Robles--San Luis Obispo<br>Extraction of about 1000 cubic yards of sand from the dry bed of the river. Sand will be skimmed with a front end loader to a depth of six to eight inches. Issuance of a Streambed Alteration Agreement Number R3-2001-0442, pursuant to Fish and Game Code Section 1603.  | <b>NOE</b>       |                |
| 2002068172   | Santa Ana River Trail Phase I<br>San Bernardino County<br>Colton--San Bernardino<br>The project consists of construction of a 10 foot wide asphalt-paved hiking/bicycle trail system along the southern portion of the Santa Ana River from La Cadena Drive, in the City of Colton, to Waterman Avenue, in the City of San Bernardino, a distance of approximately 3.5 miles. The trail system will be located on top of the existing Flood Control District levees and maintenance roads. The project will consist of the installation of a 14 foot wide pre-fabricated bridge across San Timoteo Creek for pedestrian, equestrian, and cycle use, the installation of a culvert crossing at the Santa Ana River/ Reche Canyon junction, construction of a concrete 10 foot wide and 2 to 5 feet high ramp leading down to the riverbed from the Union Pacific and Burlington Northern Santa Fe Railroad overpass to just south of the La Cadena Drive Bridge, and the construction of a concrete ramp along the south bank at the La Cadena Drive bridge. Construction will disturb native soil and vegetation as little as possible. Trees are to be removed only if they are unavoidably in the path of the proposed trail. | <b>NOE</b>       |                |
| 2002068173   | Lake Perris Accessible Fishing Docks<br>Parks and Recreation, Department of<br>Perris--Riverside<br>The project involves the construction of an accessible fishing dock between the Sail Cove area and the swimming area at Perris Beach and another east of Power Cove adjacent to the horseshoe pits. Each dock will be approximately 126-feet in total length, consisting of 3 to 4 foot by 30 foot gangways, 2 to 8 foot by 10 foot dock landings, and 1 to 12 foot by 20 foot fishing floats. In addition, there will be a concrete landing and a hard surface parking area connected by a hard surface path. The two dock landings will be on piers supported by concrete pedestals measuring approximately 12 foot by 15 foot by 3 foot. The higher of the two pedestals at each location will be visible at the design low pool elevation of 1,581 feet.  | <b>NOE</b>       |                |

| 2002068174   | Gaviota Las Cruces WTP Drainline and Backwash Drywalls<br>Parks and Recreation, Department of<br>--Santa Barbara<br>Project consists of several activities to improve water quality at the Las Cruces Water Treatment plant. These activities include excavating up to three 4 ft. diameter by 40 feet deep drywells in an existing parking lot, trenching 300 feet from an existing backwash pond to the parking lot, installation of a new 1000 gallon water settling system and gravity fed drainline less than 100' in length to Las Canovas Creek. This project is supplemental to the backwash pond addition constructed in SCH #2000128349. | <b>NOE</b>       |                |
| 2002068175   | Spillway Boat Launching Ramp Extension<br>Water Resources, Department of<br>--Butte<br>The existing boat launching ramp at the Spillway of Oroville Dam consists of an 8-lane asphalt boat launching ramp that extends from elevation 820' to 725.5'. Each lane is 15' wide for a total width of 120'. The proposed project consists of adding a 4-lane wide concrete extension to this ramp from elevation 725.5' to 700' or, if lake levels drop even lower than currently projected, to 680'. The normal high water pool is at elevation 900'.  | <b>NOE</b>       |                |
| 2002068176   | Lime Saddle Boat Launching Ramp Extension<br>Water Resources, Department of<br>Oroville--Butte<br>The existing Lime Saddle boat launching ramp extends to elevation 727.5'. The lower part of the ramp is a 2-lane 30' wide concrete boat launching ramp. The proposed project consists of the extension of this ramp from elevation 727.5' to 700'. The normal high water pool is at elevation 900'. The work is based on the most probable projections for the elevation at Lake Oroville.   | <b>NOE</b>       |                |
| 2002068177   | Bidwell Canyon Boat Launching Ramp Extension<br>Water Resources, Department of<br>Oroville--Butte<br>The existing Stage II boat launching ramp at Bidwell Canyon consists of a 3-lane 45' wide concrete boat launching ramp that extends from elevation 745' to 710'. The proposed project consists of the extension of this ramp from elevation 710' to 700'. The normal high water pool is at elevation 900'. This work is based on the most probable projection for the water elevation at Lake Oroville.   | <b>NOE</b>       |                |

| 2002064007  | Control of the California Ground Squirrel at March Air Reserve Base<br>U.S. Air Force<br>--Los Angeles, San Diego<br>The purpose of the action is to reduce the population of the California ground squirrel from specific areas of the Base and to maintain a low population at MARB in the future. The areas proposed for California ground squirrel control were selected based on the need to control existing and expanding hazards to ground, air, and operations safety, and public health. MARB proposes to control the dispersion of California ground squirrel colonies and thereby limit potential damage to aircraft from foreign object damage (FOD) as a result of their burrowing activity adjacent to the runway and taxiways, as well as reduce the potential transmission of rodent-vectored disease. However, the population of California ground squirrels at MARB appears to be declining due to the current drought in Southern California (Price 2002). | <b>CON</b>       | 07/15/2002     |

|   | community park. LOM 508 involves the development of 150 single-family residential units on 39.43 acres of land. LOM 508 is zoned as 7-R-1 (Low Density Residential, 7,000 square foot minimum lot size). The portion of the project proposed on LOM 508 would be consistent with the current General Plan land use designation of Low Density Residential. Zoning designation changes are proposed from PM (Planned Manufacturing) to R-2, PD (Medium Density Residential, Planned Development) on LOM 513 and from 7-R-1 (Low Density Residential, 7,000 square-foot minimum lot size) to R-1, PD (Low Density Residential, Planned Development) on LOM 508.  |                  |                |
| 2002062082  | City of Elk Grove General Plan EIR<br>Elk Grove, City of<br>Elk Grove--Sacramento<br>The City of Elk Grove General Plan process began in July 2001. The Elk Grove General Plan will show land uses in two ways. Specific land uses will be shown within the City limits and the proposed sphere of influence, which will be called the General Plan Land Use Policy Area. The General Plan will also show conceptual land uses within the proposed sphere of influence and the remainder of the planning area, excluding the City. This will be called the Conceptual Land Use Policy Area. There will be an overlap within the two different plans, as the land uses in the proposed sphere of influence areas will be shown conceptually as well as on a parcel-specific level. The City of Elk Grove adopted the Sacramento County Zoning Code in July 2000. Following the adoption of the General Plan, the Zoning Code and Zoning Map will be amended to be consistent with and implement the General Plan.   | <b>NOP</b>       | 07/22/2002     |

| 2002031117  | Affordable Housing Policy Marina del Rey<br>Los Angeles County Dept of Beaches And Harbors<br>--Los Angeles<br>The proposed affordable housing policy for new development in County-owned Marina del Rey is to implement the requirements of the Mello Act. The policy proposes that 10% of all new residential units built on County-owned Marina del Rey parcels be set aside for persons and families of low income for a period of 30 years. In the event that construction of the affordable units on-site on the Marina parcel is infeasible, the policy proposes construction by the County of the required affordable units off-site elsewhere in the unincorporated Coastal Zone or within three miles thereof. In the event construction of the required affordable units is infeasible within the above-described off-site target area, then the policy proposes construction by the County of the required affordable units elsewhere within the unincorporated area of the County of Los Angeles. The policy proposes that if off-site construction of affordable units is necessary, the developer (lessee) of the involved county-owned Marina del Rey parcel shall pay an in-lieu fee in the amount of \$7.45 per net rentable square foot of development, plus an administrative fee equal to five percent of the in-lieu fee collected for the purposes of defraying County costs in constructing the off-site affordable units. The policy further proposes payment by the developer (lessee) of \$250/ year per affordable | <b>Neg</b>       | 07/22/2002     |

| 2002062080  | Mirant Power Generation Plant Annexation Project<br>Pittsburg, City of<br>Pittsburg--Contra Costa<br>The City of Pittsburg approved Resolution No. 01-9428 on July 16, 2001, thereby adopting a Resolution of Intent to amend the City's zoning map for the rezoning of the Northwest River Area west of downtown Pittsburg. The City is proposing to annex approximately 964-acres of unincorporated Contra Costa County land along the southern shoreline of Suisun Bay. Lands proposed for annexation include mainly industrial lands associated with the Power Plant and open space areas situated along transmission and railroad corridors and surface waters north of the Power Plant. In rezoning the annexation area, the City has proposed to maintain existing land uses, thereby conforming with current Contra Costa County General Plan Land Use designations for the project area. No development is proposed as part of the annexation. In annexing the subject properties, the City will provide certain public services that were previously provided by the County. In some circumstances, the City is currently entered into a contractual agreement with a special district that currently provides service to the annexation area. Under these circumstances, the special district will continue to provide these services. | <b>Neg</b>       | 07/22/2002     |

This contract would also renovate the kitchen, open a skylight in the corridor and provide other minor repairs.  | <b>NOE</b>       |                |
| 2002068245  | HHWVAR020501-Variance to the City of Los Angeles to Operate Four-Days Household Hazardous Waste Collections Event<br>Toxic Substances Control, Department of<br>Los Angeles, City of--Los Angeles<br>Variance to the City of Los Angeles from hazardous waste facility permit requirements. The variance is limited to the four days household hazardous waste (HHW) collections event listed above. The collections provide appropriate means of disposing of household and conditionally exempt small quantity generator (CESQG) hazardous waste. The variance is based on the evidence that: 1) The four days collections are to be operated similar to permit-by-rule temporary HHW collection facilities; 2) Only personnel trained in hazardous waste management shall handle or package hazardous waste; and 3) All collected wastes will be manifested and transported by registered transporter to permitted hazardous waste recycling, treatment, storage or disposal facilities within 144 hours after | <b>NOE</b>       |                |

|   | each waste collection event has ended.   |                  |                |
| 2002068246  | Little Lake City School District, Jersey Elementary School Removal Action<br>Workplan Approval<br>Toxic Substances Control, Department of<br>Santa Fe Springs--Los Angeles<br>A RAW will implement clean-up procedures at the Site for the excavation and<br>off-site disposal of contaminated soils. During the proposed excavation, no<br>unauthorized persons will be allowed on the Site.  | <b>NOE</b>       |                |
| 2002068247  | Removal Action Workplan for Mangels Ranch<br>Toxic Substances Control, Department of<br>Fairfield--Solano<br>The project involves the excavation and offsite disposal of soils contaminated with<br>up to 13 parts per million (ppm) toxaphene. Soil excavation is planned in three<br>areas. A total of approximately 1,800 cubic yards of contaminated soil will be<br>excavated from these areas. A similar quantity of clean fill will be used to refill the<br>excavations and the areas will be restored to their original grade.  | <b>NOE</b>       |                |
| 2002068248  | Removal Action Workplan for Roberts Tires Facility<br>Toxic Substances Control, Department of<br>Fairfield--Solano<br>The project involves the excavation and offsite disposal of soils contaminated with<br>lead and motor oil. The elevated soil concentrations that will be addressed include<br>up to 36,400 parts per million (ppm) of lead and up to 6,900 ppm of motor oil. Soil<br>excavation is planned in two unpaved areas and one stockpile inside a building. A<br>total of approximately 400 cubic yards of contaminated soil will be excavated from<br>both areas. The contaminated soil will be characterized and be disposed of at a<br>Class I disposal facility. This removal action will reduce or eliminate a<br>contaminated source that poses a threat to human health.   | <b>NOE</b>       |                |
| 2002068249  | Prunedale One Stop<br>Employment Development, Department of<br>--Monterey<br>Lease approximately 3,544 square feet of existing office space to house Job<br>Services staff.  | <b>NOE</b>       |                |
| 2002068250  | Angels Camp Towne Center Site - Removal Action Workplan<br>Toxic Substances Control, Department of<br>Angels Camp--Calaveras<br>The project involves the removal and management of contaminated soils<br>containing high levels of lead and total petroleum hydrocarbons (TPHs) at the<br>existing Save Mart Supermarket (Supermarket) in Angels Camp, California. As<br>part of the expansion of the existing supermarket soil samples were collected and<br>analyzed for total metals and TPHs. Lead levels were detected as high as 13,000<br>parts per million (ppm) at 2 feet below-ground-surface (bgs), TPHs were detected<br>as high as 2,100 ppm at two feet bgs, soluble lead concentrations were detected<br>as high as 52 ppm at two feet bgs. Soil samples analyzed at five feet did not<br>detect the presence of lead or TPHs. Groundwater is known to exist at greater<br>than 20 feet bgs, therefore it is not suspected that groundwater has been impacted<br>by site-specific contaminants. | <b>NOE</b>       |                |

| 1998051068 | Grand Avenue Widening Project - City of Santa Ana<br>Santa Ana, City of<br>Santa Ana--Orange<br>Upgrade of existing four-lane arterial to a General Plan designated six-lane arterial.  | EIR | 08/08/2002 |
| 2001031004 | Armstrong Ranch<br>Santa Ana, City of<br>Santa Ana--Orange<br>The City of Santa Ana has prepared a Draft EIR on the proposed Armstrong Ranch Development Project. The proposed project involves the development on 46.9 acres of farmland known as the Armstrong Ranch. Development would include 156 single-family dwellings, a 99,000-square-foot church facility, and related infrastructure and landscape improvements. The project site is currently used for cultivation of lima beans and is located in a primarily residential neighborhood in the City. Surrounding land uses include single-family and multi-family residential uses, a private elementary school, agricultural farmland, and church uses.  | EIR | 08/07/2002 |
| 2001092064 | Sutter 99 Safety and Operational Improvement Project<br>Transportation Commission<br>Yuba City--Sutter<br>The project proposes to upgrade State Route (SR) 99 to a 4-lane facility with continuous median and left-turn lane from the SR70/99 junction to Sacramento Avenue and upgrade to conventional highway or expressway standards between Central Avenue (KP 27.0/PM16.8) and O'Bannion Road. In addition, the project provides for a new two-lane bridge on the Eastside of and adjacent to the existing Feather River Bridge # 18-26.   | EIR | 08/07/2002 |
| 2001121058 | College of the Canyons 2001 Facilities Master Plan<br>College of the Canyons<br>Santa Clarita--Los Angeles<br>In response to increased student growth, the 2001 Facilities Master Plan provides a framework for the College's decisions concerning allocation and management of resources, capital outlay programs, and construction planning for needed facilities and improvements. Due to the continuing rapid growth of the Santa Clarita Valley, student enrollment is projected to reach nearly 20,000 within the next 10 years. The Master Plan provides for new academic, athletic, support, and administrative facilities, improved pedestrian and vehicular circulation on campus, a new formal main entry and other improvements sufficient to accommodate the current and future student enrollment. As a result of the Master Plan, the square footage of facilities will increase by 51% to accommodate a 17,000 - 18,000 student enrollment on campus. To accommodate the additional 2,000 - 3,000 student enrollment, the College is initiating a search for an off-campus access site. | EIR | 08/07/2002 |

| 2002031048  | Church of Jesus Christ of Latter Day Saints (LDS), Newport Beach Temple<br>Newport Beach, City of<br>Newport Beach--Orange<br>The Temple is planned as a 17,575 square foot building on approximately 8.65 acres surrounded by approximately 5.5 acres of gardens, walkways, and water treatments in the western portion of the project site with parking in the eastern and northeastern perimeters of the site.   | <b>EIR</b>       | 08/07/2002     |
| 1999062089  | American River Pump Station Project<br>Placer County Water Agency<br>Auburn--Placer<br>The Proposed Project involves construction of a year-round pump station, intake/diversion and associated pipelines and access road facilities to provide PCWA improved and reliable access to its Middle Fork Project water rights water. The project is needed to provide a reliable back-up source to PCWA's other water supply sources and to meet growing demands associated with planned and approved urban development within their service area. The new pump station would permit PCWA to increase their water supply diversions from the historical maximum amount of 8,500 AF and from the anticipated No Action/No Project Alternative amount of 19,300 AF to 35,500 AF. Additionally, the Proposed Project would restore the North Fork American River flow to a 3/4-mile stretch of river that is currently dewatered and flowing through the Auburn Dam construction site bypass tunnel. The return of water to the river channel is anticipated to result in use of the project area for water-based recreation activity (primarily boating) and so, the Proposed Project also includes development of two public river access sites. The access locations would be at the Auburn Dam site upstream of the bypass tunnel outlet, and near Oregon Bar. The proposed amenities include parking, road and trail improvements to accommodate mixed recreation uses, a staffed entrance gate, and sanitation facilities (restrooms and trash cans). CDPH would oversee the use of these areas per an agreement with Reclamation. | <b>FIN</b>       |                |

|   | but have not responded to corrective pruning. They are growing above the power lines and wind sway and limb drop threatens the power lines. The trees represent an on-going risk to public safety and outages. PG&E has requested permission to remove the trees and will take care to remove all slash and brush.   |                  |                |
| 2002068290  | <p>Seismic Retrofit fo 30 Building at Patton State Hospital<br/>Mental Health, Department of<br/>San Bernardino--San Bernardino</p> <p>The Department of Mental Health proposes a seismic retrofit of the 30 Building at Patton State Hospital. The 30 Building is considered seismic deficient and is classified at Risk Level VI on a scale of I to VII with Risk Level VII being the highest risk level. This means that in a maximum credible earthquake, there would be extensive structural and non-structural damage, with collaps of some of the building components likely to occur. The seismic retrofit is necessary for the life and safety and security of all the occupants, including patienst and staff. The proposed seismic retrofit project would bring the building to Risk Level III. The project includes exterior modifications to the building including construction of piles and buttresses. The buttresses would be 15 inch thick reinforced concrete walls supported by three-foot thick reinforced concrete slab/pile cap with twelve 18-inch diameter drilled and cast-in-place piles. Exterior modifications would also include strengthening the walls with shotcrete. Interior modifications would include installation of steel drag beams, and reinforcement of connections between slab and columns and slab to walls. The seismic retrofit project would allow all windows to remain open in the building. Approved temporary modular units may be used as swing space to temporarily house patients during the construction phase of the project. The modular(s) would be sited in the field west of the 70 Building and/or in the area north of the 30 Building. If the modular(s) are to be back-filled or re-used following project construction, any subsequent use would be subject to separate environmental review.</p> | NOE              |                |

| 2002041044   | Buena Vista/Rosedale-Rio Bravo Water Banking and Recovery Program<br>Buena Vista Water Storage District<br>Bakersfield--Kern<br>The Buena Vista/Rosedale-Rio Bravo Water Banking and Recovery Program involves the recharge, groundwater banking, and recovery of water by Buena Vista Water Storage District (BVWSD) within the service areas of BVWSD and Rosedale-Rio Bravo Water Storage District (RRBWSD). Approximately 80,000 AF of BVWSD Kern River wet year water and other acquired waters will be captured and recharged within the RRBWSD service area. These recharged waters will be banked along with groundwater previously recharged within the Kern River Fan Area by BVWSD. It is estimated that upwards of 20,000 AF/Yr of banked water may be recovered or withdrawn from the banking program in order to supply water demands. Water recovered under the program may be delivered to third party customers inside and outside of the basin and Kern County. The primary method of recovery/delivery will be via exchange of State Water Project (SWP) supplies that would otherwise have been delivered within BVWSD and RRBWSD for direct recharge or irrigation purposes. RRBWSD will construct three additional extraction wells in RRBWSD's west-side well field in order to make up any shortfall during SWP water shortage years. In BVWSD, pumping from landowner and BVWSD wells will be increased in order to offset SWP exchange deliveries and satisfy irrigation demands. | <b>EIR</b>       | 08/08/2002     |
| 2000042051   | Lower Guadalupe River Project<br>Santa Clara Valley Water District<br>San Jose--Santa Clara<br>The proposed project will allow the District to improve flood protection along the lower Guadalupe River. The project uses the following methods to increase the carrying capacity of the LGR from 14,000 to 17,000 cfs: SR 237 bridge replacement, levee raises, flood walls, bed and bank stabilization measures, and storm drain outfall modifications.   | <b>FIN</b>       |                |

| 2000091065   | <p>Santa Ana Second Main Track<br/>Southern California Regional Rail Authority<br/>Orange, Santa Ana--Orange</p> <p>The proposed project is the construction of a second main railroad track immediately adjacent to, and west of, the existing single track from approximately La Veta Avenue in the City of Orange, south to 17th Street in the City of Santa Ana, a distance of about 1.8 miles. A second railroad bridge would be built over Sanitago Creek, immediately to the west of an existing bridge. The new tracks and bridge would be located within existing railroad right-of-way. Project construction between Fairhaven Avenue and 17th Street would require changes in the layout of Lincoln Avenue. These changes require the acquisition of underlying interests in several slivers of street property along Lincoln Avenue and acquisition of a small parcel of private land at the intersection of Santa Clara Avenue and Lincoln Avenue. The proposed project would include limited physical and operational improvements to four intersections (La Veta Avenue in Orange and Fairhaven Avenue, Santa Clara Avenue and 17th Street in Santa Ana), as well as all necessary safety improvements. The Volume 1A is the Summary chapter for the Recirculated Draft EIR.</p> | <b>FIN</b>       |                |

| 2002061127   | San Juan Hills Country Club Water Rights Application<br>State Water Resources Control Board<br>San Juan Capistrano--Orange<br>The applicant seeks a right to continue to divert 1.34 cfs from the underflow of San Juan Creek. Water has been pumped from the creek at three existing wells, via three 40 horsepower pumps and discharged into two 4.8 af capacity reservoirs. Applicant has been utilizing existing facilities pursuant to belief that he was pumping from percolating groundwater. A subsequent SWRCB analysis showed that the applicant was actually pumping from a subterranean stream. The current project is to acquire water rights. | <b>Neg</b>       | 07/25/2002     |
| 2002062096   | Middle Bar Take-Out Facility<br>East Bay Municipal Utility District<br>Jackson--Amador<br>The Middle Bar Take-Out Facility will support whitewater boating on the Middle Bar Portion of the Mokelumne River and fishing from the Middle Bar Bridge by developing a parking facility, a boating take-out, pedestrian paths, and a vault toilet facility.   | <b>Neg</b>       | 07/24/2002     |

| 2002068307   | Carport and Entryway Roof Repairs<br>Motor Vehicles, Department of<br>Yuba City--Sutter<br>The Department of Motor Vehicles proposes to repair the Yuba City DMV carport and entryway roof. The existing carport and roof will be torn down and replaced on an existing site. The proposed project will be located in Yuba City, Sutter County, CA. To achieve this goal, the east entry skylight canopy will be modified to eliminate water leaks and solar heat gain and a new gabled roof structure will be built over the original skylight frame, brick columns will support the new structure, the south drive-thru canopy will be removed and a new canopy will be build in the same location but the columns will be moved to the driveway area. Lighted bollards will be placed between the outside pass-thru lane and the vehicle inspection lane for safety purposes. In addition, to comply to state building code these improvements consist of regrading a portion of the east parking lot to provide a slope by a few inches, modifying the door to the employees breakroom and provide interior signage for some rooms. | NOE              |                |

| 1998031150   | Whispering Hills Estates - Revised and Recirculated Draft EIR<br>San Juan Capistrano, City of<br>San Juan Capistrano--Orange<br>The project consists of land use entitlement applications for the development of a high school and 175 single family residential units on the site. The land use entitlements consist of a rezoning ordinance changing the land use designation from "GM" Growth Management to "PC" Planned Community (with a Comprehensive Development Plan or CDP), a proposed subdivision tentative map, a Hillside Management Permit approval, and a Ridgeline Grading Exception. The San Juan Capistrano City Council originally approved the project on May 21, 2002 by introducing a rezoning ordinance and directing that a revised tentative map be brought back to the City Council for final approval. Also on May 21, 2002 The City Council directed that, as a component of the rezoning, the City may review and approve grading permits for the high school site prior to tentative map approval, providing said plans are in conformance with the rezoning approval and CDP and are complete and compliant with the city grading requirements. On June 18, 2002 the City Council approved the 2nd Reading of the Rezoning Ordinance. The project development includes a high school to be located on approximately 50 acres, 15 residential units to be located in the West Canyon area of the project site, and 160 units in the East Canyon area of the project site. Primary access is to be from Avenida La Mancha for the West Canyon and La Pata Avenue for the East Canyon residential area and high school site. | <b>NOD</b>       |                |

| 2002062102  | Central Valley High School Addition<br>Ceres Unified School District<br>Ceres--Stanislaus<br>In order to provide an additional entrance to Central Valley High, the District would purchase the project site, a 1.87 acre parcel of land between the high school site and Central Avenue. Central Valley High school was approved in 2000, following an extensive site selection process and an Environmental Impact Report, which was certified in 1998. The school has been designed, but has not yet been constructed. The proposed project would include three components: 1) A Traffic signal would be added on Central Avenue at the entrance to the high school. 2) A four-lane access road would be built on the proposed parcel, which would connect Central Avenue to the main parking lot of the high school. 3) The proposed accessway would require a reconfiguration of onsite parking to some extent to improve access, safety and functionality. However, the total number of onsite spaces anticipated pursuant to the 1998 FEIR would not change. | <b>Neg</b>       | 07/26/2002     |
| 2002062103  | The Islands at Riverlake, P01-133<br>Sacramento, City of<br>Sacramento--Sacramento<br>Entitlements to subdivide a vacant 20.6+/- acre site into 143 parcels in the Single-family Alternative (R-1A PUD) zone within the LPPT Planned Unit Development; Environmental Determination: Mitigated Negative Declaration; Mitigation Monitoring Plan; Special Permit to develop within the LPPT PUD; Tentative Map subdividing 21.4 vacant acres into 143 parcels in the R-1A PUD zone; Subdivision Modification to reduce the standard 41' R-O-W street width.   | <b>Neg</b>       | 07/26/2002     |
